

How to Save More Money on Your Prescriptions

One out every of four adults taking a prescription say it's difficult to afford their medications. Even if you aren't pinching pennies to pay for your medications, it's always nice to have a little extra money in your pocket.

Here are a few strategies to help you save on your prescriptions:

Consider a Less Expensive Generic

Generic drugs are just as effective as brand-name drugs, have the same active ingredients and go through the same rigorous U.S. Food and Drug Administration (FDA) testing, yet often are a fraction of the cost. If you are taking a brand drug, ask your prescriber if a generic alternative is appropriate.

Take Advantage of Convenient 90-Day Refills

Ask your prescriber if your maintenance medication can be filled every 90 days instead of every 30 days. Not only will you make fewer trips to the pharmacy, in many cases, you will save money, too.

You can also take advantage of our mail order pharmacy service, Costco Pharmacy, to get a 90-day supply of your maintenance medications conveniently delivered to your door.

Get Preventative Medications at Low or No Cost

Managing your health should be easy and affordable. To help you achieve this goal, your pharmacy benefit plan includes a preventative drug list that provides many medications at low or no cost to you. View the preventative drug list at epiphanyrx.com/resources.

Compare Prices to Save Even More

Did you know that not all pharmacies charge the same price for your prescription? Look up prices before you leave for the pharmacy and save!

Log in to the member portal at epiphanyrx.com to:

- Check prescription prices at local pharmacies
- Estimate your cost in real time
- Search based on your prescription history

Use Discounts to Get a Lower Price

There are many discount card, coupon and pharmacy membership programs available to members. If the discount price for the covered drug is lower than the EpiphanyRx benefit, you can submit your purchase amount using the prescription drug claim form at epiphanyrx.com/resources. The amount you paid for the covered drug can be applied toward your deductible.
